What is SCOPE of Pain?

SCOPE of Pain is designed to help you safely and effectively manage patients with chronic pain, when appropriate, with opioid analgesics. These meetings include essential clinical content on opioid prescribing as well as state-specific information, including a policy and resource panel with representatives from State and local agencies.

SCOPE of Pain Philadelphia is provided by Boston University School of Medicine with local partners Chester County Health Department, Chester County Medical Society, Chester County Overdose Task Force, Delaware County Heroin Task Force, Delaware County Medical Society, Delaware County Office of the District Attorney, Delaware County Office of Inercommunity, Department of Behavioral Health and Intellectual Disability Services, Department of Public Health City of Philadelphia, Health Federation of Philadelphia, Philadelphia/Camden High Intensity Drug Trafficking Area (HIDTA), The Philadelphia County Medical Society, Prevention Point Philadelphia, Temple University School of Social Work, and University of the Sciences. National collaborators include the Council of Medical Specialty Societies and the Federation of State Medical Boards.

Why offer this training?

The FDA has mandated manufacturers of extended release/long-acting (ER/LA) opioid analgesics, as part of a comprehensive Risk Evaluation and Mitigation Strategy (REMS), to make available comprehensive prescriber education in the safe use of these medications. Our training is based on the FDA curriculum known as the Blueprint for Prescriber Education for Extended Release and Long-Acting Opioid (ER/LA) Analgesics. Our curriculum covers all aspects of this blueprint and more to provide a comprehensive educational program.

Who is this for?

Physicians, nurse practitioners, registered nurses, nurses, physician assistants, pharmacists, and social workers.

Tuition: \$25

For more information and to register, visit scopeofpain.org

Faculty

Daniel P. Alford, MD, MPH, FACP, FASAM (Course Director) | Professor of Medicine, Boston University School of Medicine

Educational Objectives:

At the completion of this education activity, you should be able to:

- Employ appropriate assessment, monitoring and documentation strategies to meet best practice standards and medico-legal requirements when treating patients with chronic opioid therapy (COT)
- Apply a practical framework for decision-making on the initiation, dosage modification, and discontinuation of opioid analgesics in the treatment of chronic pain
- Employ consistent practice tools to adequately assess risk in patients being considered for COT and to effectively manage COT
- Confidently counsel patients and caregivers about the safe use of opioid medications and communicate about the need for close monitoring
- Effectively communicate with patients whom you suspect may be misusing opioid analgesics
- Demonstrate increased understanding of general- and product-specific information of ER/LA opioid analgesics

Accreditation

Physicians

Boston University School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

These activities have been approved for AMA PRA credit.
